

Virtual machine

VirtualBox installation instructions

The course will provide a virtual machine (VM) to support the laboratory hands-on exercises. In this appendix, you will find more information how to install the virtual machine using the software Oracle VirtualBox.

1. Install latest Oracle VirtualBox
 - a. Download the VirtualBox from <http://www.oracle.com/technetwork/server-storage/virtualbox/downloads/index.html>
2. Install the VM provided by the instructor
3. Import the Virtual Machine to VirtualBox
 - a. Startup the Oracle VirtualBox
 - b. In the Oracle VirtualBox windows, select **File > Import Appliance**
 - c. Click **Choose**
 - d. Navigate to the location of the VM files and select **linux-cybersecurity.ova**
 - e. Click Next
 - f. Check the box “Reinitialize the MAC address of all networks cards”
 - g. Click Import
 - h. A License Agreement for the virtual system will be displayed, if you accept, click on Agree
